MEDIA RELEASE

TORONTO ENVIRONMENT DAY | APRIL 2008

**FOR IMMEDIATE RELEASE**

**15 July 2008**

## **shredEX launches Scan N' Shred – Secured Document Imaging service**

TORONTO , July 2008 – shredEX is proud to announce the launch of its newest program, Scan N' Shred™ -- the secure document imaging service.

“Scan N' Shred™ is a service that was conceived directly from client feedback”, says John Estrada, shredEX Sales Director. He adds, “This is a natural step in our evolution, by adding complementary services at every stage of the document life cycle. While this is not a new concept, our service is going to be tailored for additional security measures, a reflection on our commitment to protecting our client’s document security”. The new service will enable shredEX clients to reduce space consumption from aging archives, while retaining critical information. In addition, the conversion of this information into digital format will enable immediate access to the entire database at any given moment.

shredEX will work in partnership with Cover-All Computer Services Corp. Cover-All is a premier provider of business process outsourcing services to organizations with document and data intensive applications. “Cover-All is very pleased about our partnership with shredEx. Between our two organizations, we will be able to provide our customers a complete end-to-end total document management solution for their documents”, says Dave Buck, Cover-All, Vice President, Imaging Services.

### **About shredEX Inc.**

shredEX is Canada’s fastest growing document destruction and records management company. Established in 2005, the company has steadily grown, providing paper shredding, document imaging and records management services to clients across Canada.
